

Meet your Tutor

DANIELLE JONCK

Hi, I'm Danielle, a 21-year-old Honours student at the University of Pretoria. I hold a BSc degree with majors in Human Physiology, Psychology, and Genetics. In high school, I took Mathematics, Physical Sciences, Accounting, and Alpha Mathematics.

During my undergraduate studies, I tutored students from Grade 6 to Grade 12 and developed a strong passion for helping learners build confidence in their academic abilities. At Optum Tutoring, I specialise in Mathematics, Science, English and Afrikaans (Grades 6–10).

My tutoring approach focuses on patience, encouragement, and clear explanations so that students fully understand concepts rather than simply memorising work. I aim to create a supportive and engaging learning environment where students feel comfortable asking questions, working through challenges, and building confidence in their abilities.

In my free time, I enjoy reading, listening to podcasts, exercising, watching rugby, and playing golf with my dad. If I'm not doing one of those, you'll probably find me working on a puzzle or trying to learn something new.
