

Meet your Tutor

MONALISA MASOMERA

Hi, I'm Monalisa, a final year Chemical Engineering student with over three years of tutoring experience. I completed my matric with six distinctions, which sparked my passion for mathematics and the sciences and inspired me to help other students succeed academically.

I enjoy working with students from different backgrounds and learning styles, helping them strengthen their understanding while building confidence in their abilities. My tutoring approach focuses on explaining concepts in a clear and supportive way, encouraging students to ask questions, think critically, and develop strong problem-solving skills. My goal is to create a relaxed learning environment where students feel comfortable and motivated to improve. Outside of tutoring, I enjoy going to the gym, staying active, and continuously learning new things.
