

Meet your Tutor

CASEY FOWLER

I know that for many students, Accounting can feel confusing and frustrating. Having taught the subject for more than 25 years, I've seen firsthand that with the right guidance, patience and encouragement, every student can improve. I believe in explaining concepts in a way that makes sense, working at each student's pace, and creating a relaxed, judgement-free space where confidence grows alongside results. Whether your child needs to catch up, prepare for exams, or simply feels stuck, I'm here to help them realise they're capable of far more than they think.

While I love Accounting as a subject and numbers make sense to me, I am just as comfortable with words and so a good game of Scrabble will never be turned down!
