

Meet your Tutor

CORNELIS MULLER

Hi, I'm Cor, a Veterinary Technology student at the Tshwane University of Technology who enjoys helping students grow both academically and personally. I tutor Mathematics, Biology, Physical Sciences (up to Grade 10), as well as Afrikaans, English, and Engineering Graphics and Design up to Grade 12. Through my tutoring experience, I've seen how confidence can transform a student's performance, and I enjoy helping learners improve their marks by breaking challenging concepts into simple, understandable steps.

My aim is to create a supportive environment where students feel encouraged to learn and believe in their abilities. My faith, discipline, and work ethic shape the way I mentor students. Outside of tutoring, I enjoy hunting, sports, the outdoors, reading, and movies.
