

Meet your Tutor

BLESSING MASOMERA

Hi, I'm Blessing. With over four years of tutoring experience, I've had the pleasure of working with students of diverse age groups and subjects while exploring various teaching techniques, helping them break down complex ideas into simple, clear concepts while boosting their confidence along the way. I believe tutoring should be engaging, interactive, and adapted to each student's unique pace and style of learning. My goal is to improve grades, spark curiosity in learners and help them develop genuine love for learning. Outside of tutoring, I'm a chess player and a coding geek. I enjoy building websites and coding new games in my free time.
