

Meet your Tutor

TATIANA WILLIAMS

Hi! My name is Tatiana Williams. I'm in my final year of my Mathematics Degree, studying at Stellenbosch University. I've been tutoring for two years now, teaching a range of ages from as young as 10 years old to first year science students. I tutor mostly mathematics and further studies mathematics but I'm also comfortable tutoring, English, further studies English, history, and grade 8-10 physics. I am a firm believer that with the right tutor a student can flourish in any focal area. I prioritise patience and practise in all my lessons making sure my students feel comfortable enough to ask and re ask as many questions as they need to understand a concept. In Matric I received seven distinctions out of the nine subjects I was taking and since then have become even more comfortable with the matric IEB mathematics syllabus as I've tutored it for multiple students. Outside of tutoring I enjoy reading, hiking and any moment I can spend with my friends and family.
